VAPOR SERIES

The Vapor name has become synonymous with balance and speed. As we moved to our 2020 shape, we simply wanted to build on the foundation we had created. The overall width of the ski has been decreased in an effort to create more efficient water flow and allow the ski to have a more level ride. Rocker was modified to increase the drive behind the boat and allow the ski to create more angle before the buoy. Lastly, we increased the concave and let it run through the tail of the ski to give more support and consistency at the apex of the turn. All these simple changes allowed us to build a ski that is faster than its predecessor, has more automatic turns and gives a truly consistent ride from turn to turn. You have to ski this thing. Welcome to 2020 Vapor.

VAPOR PROBUILD *New*

By riding a Pro Build Vapor you ensure that you have the best materials wrapped into the best shape on the market. Now all you have to decide is what colour you like best.

SENATE SERIES

The Senate's ability to carry speed is unmatched in the industry. This speed allows the skier to maintain width on the boat ultimately giving a sense of freedom sought after by those that ski in the course as well as those ripping open water turns. By taking our Vapor shape and adding two tenths of an inch in extra width we have created a stable riding platform. This platform creates the balance needed for a skier to feel at home, while the profile of the ski allows the skier to feel the speed and angle sought after at any level.

SENATE PRO BUILD *New*

PMI foam is undoubtedly the lightest, most responsive foam on the market. Radar wrap that foam in Textreme spread tow carbon to make this all-new Senate the fastest, most aggressive Senate, Radar ever created.

HO SYNDICATE

The Syndicate has one goal: build the world's greatest tournament water ski. Syndicate skis are more than water skis. They represent the pride, determination and passion of the sports' greatest minds and most talented athletes. For 2020, the Syndicate is proud to announce ther greatest slalom super-ski to date, the all new Syndicate Omega.

HO SYNDICATE OMEGA

The Omega ski shape has increased surface area in the back of the ski in relationship to the forebody. The result is a ski that rides more in-trim or parallel to the water surface. By reducing how much water the Omega is pushing, efficiency is improved and skier turn speed is carried deeper into the cut, helping hide the skier from the speed control.

The Alpha shares the same width profile as the Syndicate PRO, but is designed with a shallower concave depth in the tail of the ski, and a flatter tip rocker, for a loose and light feel on the water. With less downforce than the PRO, the Alpha accelerates with less physical effort, and projects wider off the second wake. The shallower tail concave allows the Alpha to have more turn drift for tight rope turn finishes.

The narrow width profile with aggressive tail taper turns and rolls on edge easily to generate massive amounts of angle. It's large bevel size in tail results in increased hold at the finish of the turn.

RONIX

Started out strapping into bungees, riding a phaser equiped, directional shape, tri-fin powered special. Thru time - admired, mocked and mimicked - until eventually the market was marked with confusion. Which leaves us here - a clean slate of friends with a similar sound. Riders and believers as owners making riding devices collectively crafted for the imagination of wakeboarding. Our axiom will always be based on products and tales of tomorrow's riding. A chance to make a point, confront the norm, and answer the question why. We hope you enjoy riding the products half as much as we do making them.

RONIX RXT

The 2019 WSIA innovation of the year is back with a new look, a bigger size, and a added dose of secret sauce. The continuous rocker RXT is the best blend of response, feel, weight, and ultra soft landings ever developed. The world of wakeboarding just changed again – brought to you by the people who created the wakeboard.

Sizes:136, 140, 144, 148cm
Price:**\$1,499.95 blank**
Price:**\$2,449.95 w/Rxt**
Price:**\$2,399.95 w/One**

RONIX ONE TIMEBOMB *New*

The most advanced 3-Stage rocker wakeboard ever made – just got some new additions. A new shape with added fuse stringers, channels, a redeveloped profile, and a faster more controlled bottom design, with the same proven iconic 3-stage lift off the wake. The Timebomb delivers the most solid, quick reacting, explosive snap off the wake, with added glide speed, for reduced drag on the water.

Sizes: 134, 138, 142, 146cm
Price: **\$1,299.95 blank**
Price: **\$2,239.95 w/One Carbitex**
Price: **\$2,199.95 w/One**

RONIX ONE ATR *New*

The same proven shape as the Time Bomb – with a slightly toned-down core. This edition gives up a little boost but has more feel than its Time Bomb counterpart. A heavy weight champ off the wake with added glide speed, for reduced drag on the water and resistance to your body. The Fused Core gives up a little of the hangtime of its Timebomb counterpart for more feel on the water.

Sizes: 134, 138, 142, 146cm
Price: **\$999.95 blank**
Price: **\$2,099.95 w/One Carbitex**
Price: **\$1,899.95 w/One**

RONIX SUPREME SANDWICH ATR *New*

A new school shape created by a recent emerging riding style of wake astronauts. Tyler and Jake were looking for something our engineers didn't know would be possible – a combination of an explosive take off, with the feel of their favorite wood park board. The result is the only Sandwich constructed wakeboard in the market, featuring a light and lively Air Core running tip to tail through the middle of the board, and their favorite wood running the length of the top and bottom of the Air Core.

Sizes: 137, 141, 145cm
Price: **\$1,099.95 blank**
Price: **\$1,849.95 w/Supreme**
Price: **\$1,749.95 w/Parks**

RONIX PARKS

The most legendary name in wakeboarding has created his most user-friendly board with this ultra-fast glide speed and a smooth, stable shape. We borrowed technology from the golf industry and ran dimples through the entire bottom of the board to reduce friction from the water and create a board that will break free unlike any other shape out there.

Sizes: 134, 139, 144cm
Price: **\$849.95 blank**
Price: **\$1,499.95 w/Parks**
Price: **\$1,399.95 w/Anthem**

RONIX WEEKEND

Like the amplitude of a classic 3-stage rocker, but would rather have the detuned core of the popular One series that shares a similar rockerline? The Weekend sits deeper on edge, for a more stable connection between rider, board and waterline. Ronix proudly present one of the most affordable values with a traditional feel both on the water.

The innovative Vault recognizes that your body is crossed up riding toeside, and more inline riding heelside, and every aspect of this board takes this into consideration for the proper building block of wakeboarding. Now, regardless of a toeside or a heelside cut, a rider feels more secure with their approach.

Sizes: 134, 139, 144cm

WAKE

HYPERLITE **RUSTY PRO**

Rusty Pro shape provides the surface area for massive airs but he says “My board feels lighter than anything I’ve ever ridden.” With more length comes a wider overall profile, creating a more poppy feel, “Light & poppy & snappy” says Rusty. New for Rusty is a set of shorter .7” SS Beam Fins, which when desired will allow you to break free or save landings when you’re a tad off the mark.

Sizes: 140, 143, 146cm

Price: **\$749.95 blank**

Price: **\$1,299.95 w/Defacto**

HYPERLITE **MURRAY PRO**

Shaun Murray is re-releasing his 20th Pro Model edition, simply named “The Murray”. The Murray shape begins with a Subtle 3-Stage rocker, where there is no flat spot, the rocker simply increases under foot for a colossal boost off the wake. Carrying on from past shapes, Shaun kept the Variable Edge Design and Center Landing Spine making the board enjoyable for all ability levels.

Sizes: 134, 139, 145, 150cm

Price: **\$749.95 blank**

Price: **\$1,249.95 w/Team X**

Price: **\$1,029.95 w/Team OT**

Price: **\$579.95 blank**

Price: **\$929.95 w/Formula**

HYPERLITE **STATE**

Creating a shape to take riders’ skills to the next level was the goal behind the new State 2.0. Learning from other asymmetrical designs, we found that creating a shorter but more effective edge on a rider’s toe-side made hard to learn wake jumps that much easier. The State 2.0 has been tested and proven to be the best choice for a rider looking to master the foundations of wakeboarding.

Sizes: 130, 135, 140, 145cm

Price: **\$499.95 blank**

Price: **799.95 w/Remix**

LIQUID FORCE **RDX**

The quad molded-in fins are deep enough for extra hold when needed, but still allow for a loose, fun ride. The aggressive 3 stage rocker gives you the pop you are looking for while the single to double concave center softens the landings when you really send it. Experience this board and see why Raph gives it his stamp of approval.
